

# VILLAGE OF GLENCOE SIDEWALK REPLACEMENT PROGRAM

The Village provides an annual sidewalk replacement program that addresses deficient public sidewalk throughout the Village's street right-of-ways. Designated areas are inspected each year and sidewalk squares that do not meet the Village's specifications are scheduled for replacement as part of a maintenance contract.

Beginning this year, the Village is initiating a program where residents may choose to replace public sidewalk adjacent to their property, as part of the Village's contract, at their own expense. This new program is not intended to replace the Village's annual maintenance contract or its responsibility to provide a safe and reliable sidewalk system, but to simply allow an opportunity for residents to replace public sidewalk in front of their home at a competitive unit price.

The cost to replace concrete sidewalk in 2008 is \$115 per square (5 ft. x 5 ft. area). The minimum request eligible is for 3 squares. Residents interested in participating should complete the following application coupon.
